**SHORT-TERM (today and 5 days out)**

For Tuesday, 90.76-89 can contain selling through the balance of the week (assuming an open above), above which 94.71 is expected over the next 3-5 days. Upside Tuesday, 92.40 should contain initial strength, beyond which 93.00 is expected intraday, able to contain session strength. Closing above 93.00 indicates 94.71 tomorrow, targeted short-term resistance able to contain strength through next week, and the level to settle above for signaling a good March low. Downside Tuesday, breaking/opening below 90.760 allows 90.12, possibly 89.35 intraday, while closing below 90.76 indicates a good high for the week, 86.78 then expected within 3-5 days, likely to contain multi-session lows.

**MID-TERM (2-3 weeks)**

94.71 can contain strength through next week, once tested the early March low rent for retesting within several weeks. A settlement above 94.71 indicates a good March low, 100.10 then expected within several weeks, able to contain strength through April activity. Downside, a settlement back below 90.76 should mark a good March high, 86.78 then expected by the end of next week, 84.13 into early April trade, the start of a range of long-term support down 82.45 able to contain 2013 lows.

**LONG TERM (2-3 months +)**

The 84.13 formation represents the start of a narrowing range of long-term support down to 82.45 able to contain 2013 selling pressures, once tested the market prone to rotating up into the upper end of its two-year congestive range, the 100.10- 105.17 region then attainable within 3-5 months (see page 2).
